

Science Activity w.c. 1st June

Go through the **Lesson Presentation**.

What are the different types of teeth in your mouth?

How many teeth have you got?

How many new teeth (permanent teeth)?

How many baby teeth (milk teeth)?

Why do you lose your milk teeth?

Children have 20 teeth: 8 incisors, 4 canines and 8 molars. Adults have 32 teeth including wisdom teeth.

Go through the different types of teeth on the **Lesson Presentation**.

Where in the mouth are they?

What are they used for?

Task: Complete **Type and Function of Teeth Sheets**.
