

## Design and Technology

Making and designing

# a Viking Longship

Name: \_\_\_\_\_

## Research      Skill: I can collect information about Viking longships.

What were they made of?

---

---

---

---

How big were they?

---

---

---

---

How did they move?

---

---

---

---

What were they used for?

---

---

---

---

# Initial ideas

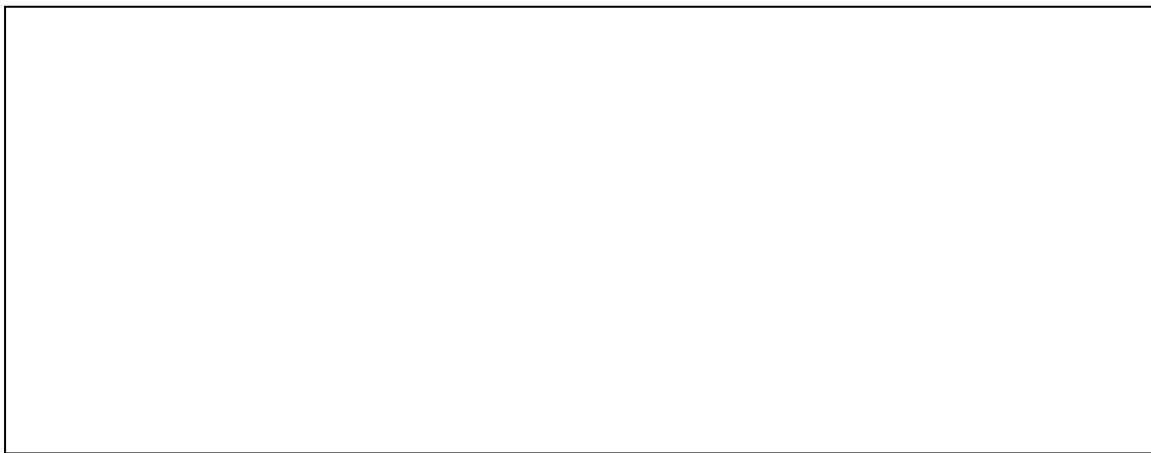

Skill: I communicate my ideas

Firstly, you need to think about the design of your Longship

Base

Sail

Draw the structure of your boat. They would have been made out of wood.

Now you need to design your sail. Sails were usually plain or striped. Try to design your sail to reflect your personality. Sketch 2 designs.

--	--

Sketch 3 shields for your boat. Shields were circular and brightly coloured.

--	--	--

Materials/ equipment needed:

-

# Evaluating

Skill: I recognise what I have done well in my work. I suggest things I could do in the future.

What are the strengths of your longship?

<hr/> <hr/> <hr/> <hr/>
-------------------------

If you made a longship again in the future, what improvements would you make?

<hr/> <hr/> <hr/> <hr/>
-------------------------

Are you pleased with your final product? What do you like?

<hr/> <hr/> <hr/> <hr/> <hr/> <hr/> <hr/>
