

## OREO FUDGE WITH 3 INGREDIENTS

First up, **grab** your 1 tin of condensed milk, **pour** this into your saucepan. Then, you **need** 510g of white chocolate. Add this to the pan and turn on to a low heat. **Stir** it **regularly** to stop it sticking to the base and burning. **Keep stirring** until it is fully melted. Your mixture should be thick. **Add** your 15 crushed Oreos and fold them in saving some for the top. **Pour** the mix into a lined baking tray and quickly spread it to the edges. **Add** the rest of the crushed Oreos to the top, making sure you press them in, so they stick. **Leave** the fudge to set at room temperature or in the fridge to set quicker. **Cut** it up and were done.
