

6/1/21

Year 2 Science - Uses of Everyday Materials

- I can identify uses of different everyday materials.

- I can identify different everyday materials.
- I can suggest materials that familiar objects are made from.
- I can explain what 3 different materials can be used for.

- I can identify uses of different everyday materials.

What Do We Already Know?

Think back to your Science learning in Year 1. See if you can answer some of these questions with a partner:

How many everyday materials can you name and what were the materials used for?

Can you remember anything about them?

- What did they look like?
- What did they feel like?
- How did they behave?

Can you remember doing any investigations?

What did you find out and what did you learn?

- I can identify uses of different everyday materials.

Identifying Materials

Wood

Look the different materials!

Identifying Materials

Plastic

- I can identify uses of different everyday materials.

Identifying Materials

Glass

Look the different materials!

Identifying Materials

Metal

- I can identify uses of different everyday materials.

Identifying Materials Rock

Look the different materials!

Identifying Materials Brick

Identifying Materials Paper

Look the different materials

Identifying Materials Cardboard

- I can identify uses of different everyday materials.

Think Again...

Look at the materials in these photos. What might they be used for?

Have a look around your home. Can you see any familiar objects which are made from these materials?

- I can identify uses of different everyday materials.

Choose one of the activity sheets to complete and identify objects around your house made from the different materials

Identifying Uses of Everyday Materials

Identifying Uses of Everyday Materials

Look around you for any one of these materials they have and fill in the table. A few have to draw for you to help you get started. Remember - some uses may come when from their own material. For example tubes can be made from plastic, wood and metal.

Wood	Plastic	Glass	Metal	Rock	Brick	Paper	Cardboard
tube	tube						

Identifying Uses of Everyday Materials

Match the materials to their uses.

See if you can think of your own uses for the last two materials. Draw them here and match them up.
