

Number bonds (1)

1 What number bond is represented by the ten frames?

a

There are _____ black counters. There are _____ red counters. Altogether there are _____ counters.

$$\underline{\quad\quad} + \underline{\quad\quad} = \underline{\quad\quad}$$

$$\underline{\quad\quad} + \underline{\quad\quad} = \underline{\quad\quad}$$

b

There are _____ black counters. There are _____ red counters. Altogether there are _____ counters.

$$\underline{\quad\quad} + \underline{\quad\quad} = \underline{\quad\quad}$$

$$\underline{\quad\quad} + \underline{\quad\quad} = \underline{\quad\quad}$$

c

There are _____ black counters. There are _____ red counters. Altogether there are _____ counters.

$$\underline{\quad\quad} + \underline{\quad\quad} = \underline{\quad\quad}$$

$$\underline{\quad\quad} + \underline{\quad\quad} = \underline{\quad\quad}$$

d

There are _____ black counters. There are _____ red counters. Altogether there are _____ counters.

$$\underline{\quad\quad} + \underline{\quad\quad} = \underline{\quad\quad}$$

$$\underline{\quad\quad} + \underline{\quad\quad} = \underline{\quad\quad}$$

e

There are _____ black counters. There are _____ red counters. Altogether there are _____ counters.

$$\underline{\quad\quad} + \underline{\quad\quad} = \underline{\quad\quad}$$

$$\underline{\quad\quad} + \underline{\quad\quad} = \underline{\quad\quad}$$

Number bonds (1)

1 What number bond is represented by the ten frames?

a

There are 5 black counters. There are 15 red counters. Altogether there are 20 counters.

$$\underline{5} + \underline{15} = \underline{20}$$

$$\underline{15} + \underline{5} = \underline{20}$$

b

There are 6 black counters. There are 14 red counters. Altogether there are 20 counters.

$$\underline{6} + \underline{14} = \underline{20}$$

$$\underline{14} + \underline{6} = \underline{20}$$

c

There are 9 black counters. There are 11 red counters. Altogether there are 20 counters.

$$\underline{9} + \underline{11} = \underline{20}$$

$$\underline{11} + \underline{9} = \underline{20}$$

d

There are 12 black counters. There are 8 red counters. Altogether there are 20 counters.

$$\underline{12} + \underline{8} = \underline{20}$$

$$\underline{8} + \underline{12} = \underline{20}$$

e

There are 17 black counters. There are 3 red counters. Altogether there are 20 counters.

$$\underline{17} + \underline{3} = \underline{20}$$

$$\underline{3} + \underline{17} = \underline{20}$$
