

Yesterday we were learning how to divide by 10

Lemons can be sold in bags of 10.
How many bags can be made below?

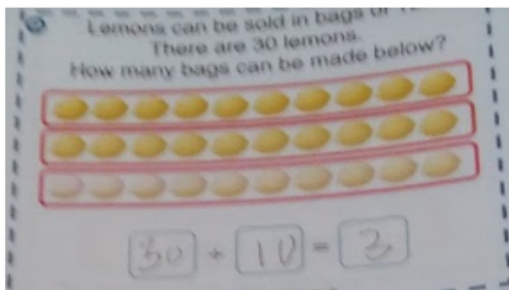

How many are in each row?

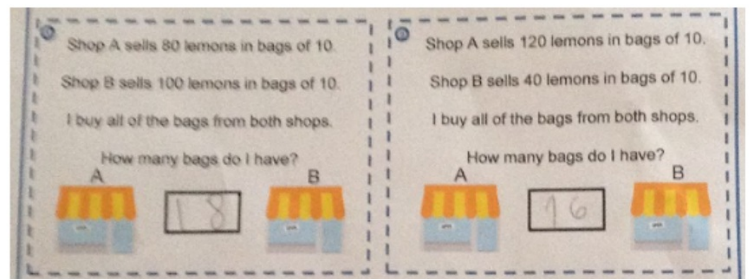

How many do we have in total?

$$\underline{\hspace{2cm}} \div \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

Good understanding of what each number means

Used dividing by 10 to answer tricky problems

Put answers for each step along the way

WALT: Divide by 5

Circle all of the numbers in the 5 times table.

15	3	25	32	55
26	50	47	5	40
35	21	30	59	8
60	10	45	34	20

How could we re-write this as a multiplication question?

Divide the 55 flowers into groups of 5 and complete the number sentence.

55 flowers arranged in a 5x11 grid.

\div 5 =

1b. Divide the 20 pairs of glasses into groups of 5 and complete the number sentence.

$$\square \div 5 = \square$$

WALT: Divide by 5

How many glasses are there in total?

How many groups of 5 are there?

How many groups of 5 are there?

6a. True or false?

$$35 \div 5 = 7$$

4b. 55 crayons are shared equally between 5 people.

I think they will get 9 crayons each

I think they will get 11 crayons each.

Who is correct? Explain why using a division picture to prove it.

WALT: Divide by 5

How many groups of 5 can we make out of 55 crayons?

How many coins are there in total?

How many groups of 5 can we make out of the total?

Tony wants to share his money between his 5 friends. How much will they each get?

Explain your answer.
