

Wednesday 24th February 2021

To get warmed up today we are going to do some counting on. Using your digit cards in your Maths folder, take out the numbers 0-10. Pick one card and count on from that number until you get to 10. Use a number line if you need it.

7

7, 8, 9, 10!

5

5, 6, 7, 8, 9, 10

Today we are going to be looking at sharing. We all know how to share! Sometimes sharing is difficult, but we all know what we have to do!

What things do we have to share at school/home? Who do we share with? Why do we have to share?

When we share something it has to be *fair* and *even*. What does this mean? Watch this video about sharing cookies...

[Sharing Cookies - YouTube](#)

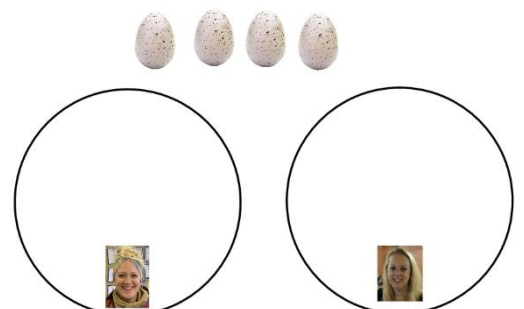

Talk about the video with an adult. Did Elmo and the Cookie Monster share fairly? Were they both happy in the end? Why?

When we share something it is important we all get the same amount.

Let's have a go at sharing some dinosaur eggs. I am going to share 4 eggs between Mrs North and Miss Wingett. Can you help? Give one to Mrs North, one to Miss Wingett, one to Mrs North and one to Miss Wingett and so on until there are none left.

How many eggs should they both get? Is it equal? Is it fair?

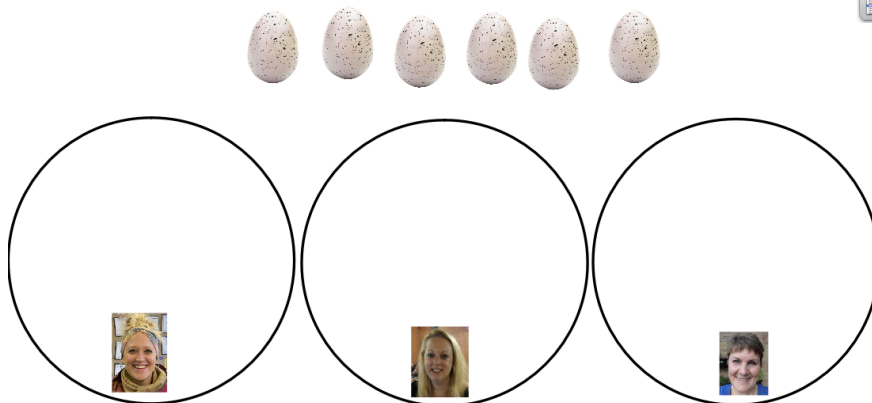

4 shared by 2 is

This time I have 6 eggs. What is 6 shared by 2?

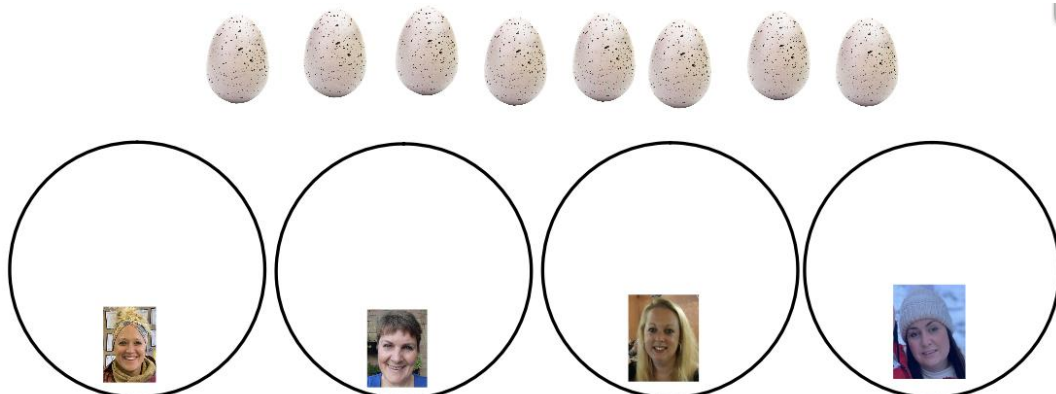

6 shared by 2 is

This time Mrs Hill would like some dinosaur eggs too! Can we share the 6 eggs between 3 people? Have a go...

6 shared by 3 is

This time there are 4 people. Mrs Jones would like a share of the dinosaur eggs. How many eggs would everyone get if we shared 8 eggs by 4 people?

8 shared by 4 is

Practise sharing some things at home fairly with your family.
