

Yesterday we were investigating whether
3d shapes had flat faces or curved surfaces

and stick the shapes into the Venn diagram

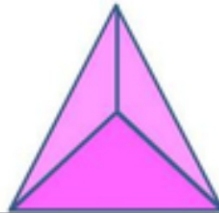

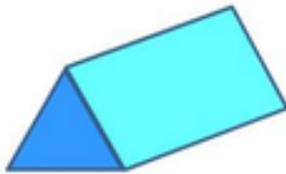

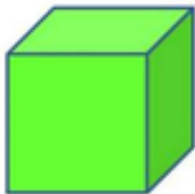

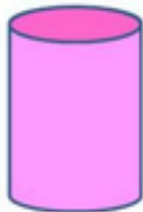

Some of you sorted
3d objects in your house

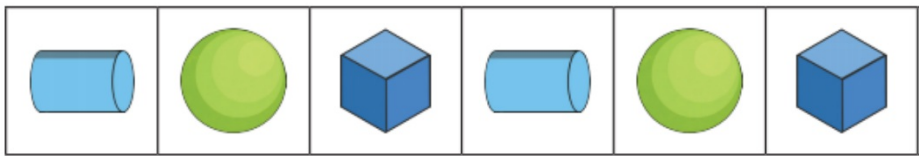

You understand the difference
between something which is
flat or curved

Let's have a look
at a Pyramid
together

Can we remember the names of
3d shapes?

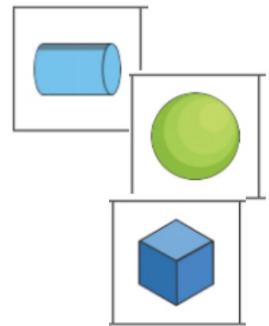

WALT: Make patterns with 3d shapes

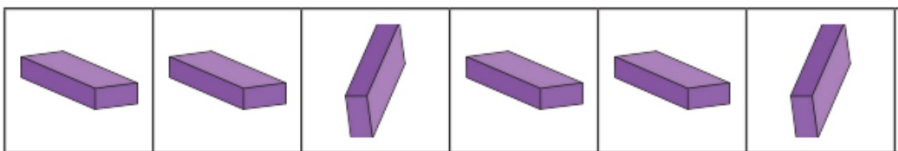

What shapes can we find in this pattern?

How many shapes are there before it repeats itself?

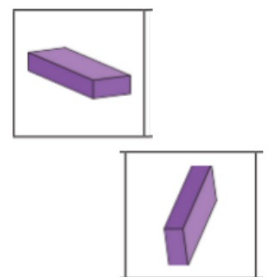

WALT: Make patterns with 3d shapes

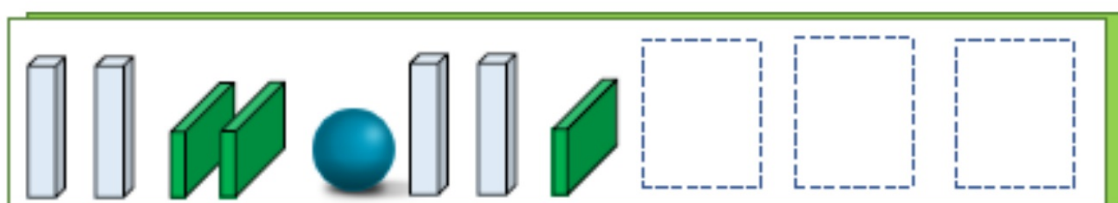

What shapes can we see in this pattern?

How many shapes are there before it repeats itself?

WALT: Make patterns with 3d shapes

What shapes can we in this pattern?

How many shapes are there before it repeats itself?
