Stand up and get ready to move with Jack Hartmann!

[Count to 20 and Workout](#) | [Fun Counting Song for Kids](#) | [Count by 1's to 20](#) | [Jack Hartmann - YouTube](#)

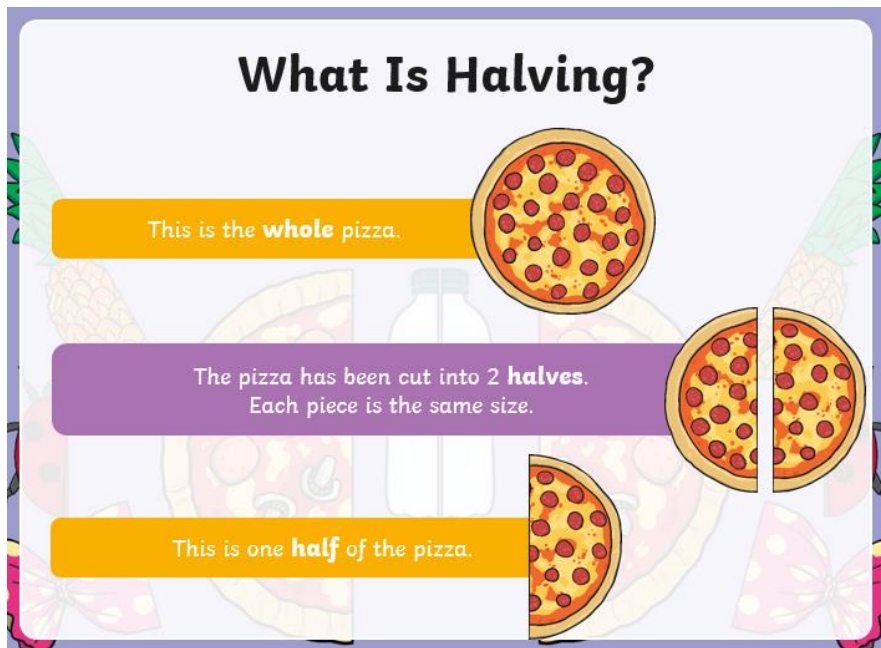

Today we are going to learn to half things. What does the word half mean? When we half something we split it into 2 **equal parts**. It's a bit like the sharing we did last week and 'when we share, we make it fair'.

When we half we must...

Split something into 2 **parts**

The parts **MUST** be the same size. They must be **equal**.

It has to be **fair**.

Let's look at this birthday cake. I am going to half it and give half to Mrs North and half to Miss Wingett. Are the pieces equal?

Two halves make a whole.

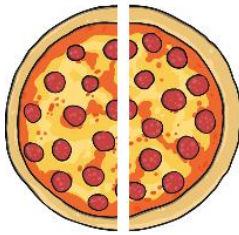

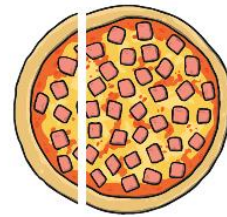

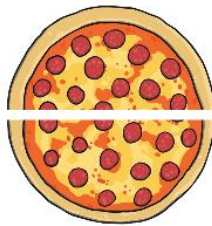

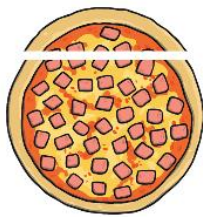

I went to the shops and bought a gingerbread man. I couldn't eat it all so I broke it in half and gave half to my friend.

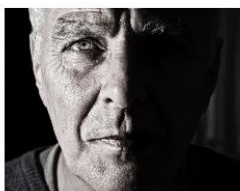

Have I done it correctly? Explain how you know.

Could I break in half this way...?

Which of these pizzas are showing halves? Explain how you know. What has to be the same about both pieces?

Look at the pictures below and discuss with your grown up why they are all showing halves.

*At home have a go at cutting these shapes in half.
Send us some pictures of your work on Evidence Me.*
