WALT: Write *explanations* about Penguins

How do Penguins look after their eggs?

When a Penguin lays an egg, it needs to keep it warm so it doesn't freeze. The Mother flicks her tail forward to catch the egg and wraps her feet around it. She then passes it to the Father who keeps it warm for 2 months until it hatches.

WALT: Write *explanations* about Penguins

How do Penguins look after their babies?

When the Mother returns from the sea, the Father passes the chick back to her. She keeps it warm in her pouch so that it doesn't freeze. She feeds it fish and squid from her mouth to help it grow. When the chicks are a bit bigger, they huddle together so that they can keep warm.
