

Yesterday, we were writing explanations about how Penguins look after their young

1. How do Penguins look after their eggs?  
The mother wraps feet around the egg to keep it warm. The mother catches the egg with her tail. The mother quickly passes the egg to the father so the mother can eat.

2. How do Penguins look after their babies?  
The father gives the baby to the mother. The mother gives squid and fish to the baby. The babies start to learn to huddle up warm.

1. How do Penguins look after their eggs?  
They put the egg in between the mothers flippers. She quickly passes the egg to the father. The Mother catches the egg with her tail.

2. How do Penguins look after their babies?  
The baby eats squid out of the Mother's mouth. They learn to huddle up to keep warm. The Father passes the chick back to the Mother.

You wrote your answers in full sentences

Using scientific language

'Mother' instead of 'Mummy'

You remembered lots of detail from the videos

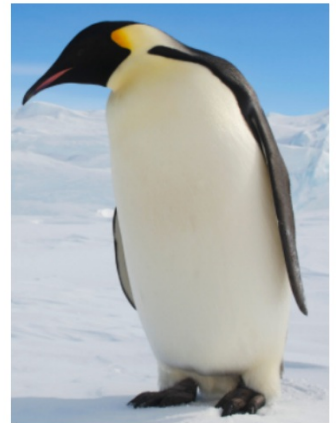

Can you add in precise details like what they eat?

WALT: Explain how Penguins keep warm

How do we keep warm in the winter?

WALT: Explain how Penguins keep warm

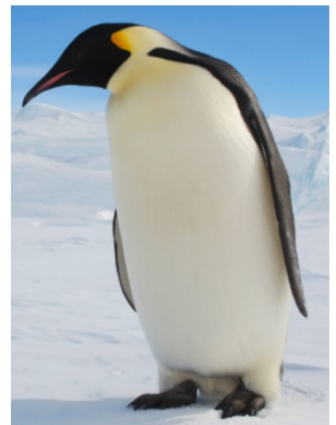

How does a Penguin's body help it keep warm?

Key words:

- layers
- fat (blubber)
- feathers
- density
- oil

WALT: Explain how Penguins keep warm

How does a Penguin's body help it keep warm?

Penguins have two layers of skin to help them keep warm. They have a layer of fat called blubber and a layer of feathers. Their feathers are very dense meaning that they are packed together very tightly. They also spread a special oil on themselves to make them windproof and waterproof.

Key words:

- layers
- fat (blubber)
- feathers
- density
- oil

WALT: Explain how Penguins keep warm

What else do Penguins do to keep warm?

Key Words:

- huddle
- group
- rotate
- cold
- hot

WALT: Explain how Penguins keep warm

What else do Penguins do to keep warm?

Penguins also keep warm by huddling together in large groups. They take turns on the outside of the huddle and then rotate into the middle. When they get too hot, they rotate back to the outside of the huddle.

Key Words:

- huddle
- group
- rotate
- cold
- hot
