

Maths Revision Schedule for Terms 4 and 5 2026

Over the next two terms, we will be consolidating the knowledge the children have developed so far this year. We will be revisiting topics we have already covered, as well as looking at some new areas of maths. We hope that this will enable the children to build their confidence when tackling a range of mathematical problems.

Below is an overview of the areas we will be covering, as well as links to the CGP KS2 Maths Study and Question books to support your child in furthering their revision at home.

Date	Maths Topics Covered	CGP Maths Study Book and Question Book
Week 1 23.02.26	Converting units – metric and imperial units for mass, capacity and length.	Section 5 of both books – Measure.
Week 2 02.03.26	Ratio and Proportion – unequal sharing and scale / enlargement	Section 4 of both books - Ratio and proportion
Week 3 09.03.26	Algebra – working with formulae, expressions and number sequences.	Section 4 of both books - Algebra
Week 4 16.03.26	Area, Perimeter and Volume – finding the area and perimeter of rectilinear shapes, finding the area of triangles and parallelograms and finding the volume of cuboids	Section 5 of both books – Measure.
Week 5 23.03.26	Coordinates, Translation and Reflection – reading and plotting coordinates in four quadrants, problem solving with coordinates and translating and reflecting shapes	Section 6 of both books – Geometry
Week 6 30.03.26	Practice Tests and Revision	This would be a great opportunity to revise statistics. Section 7 of both books - Statistics
EASTER		
Week 7 20.04.26	Place Value – investigating the value of digits and $\times 10 / 100$ etc. Rounding – rounding amounts to the nearest ten/hundred/thousand. Negative Numbers – ordering and solving temperature problems. Decimals – ordering and using in calculation. Factors and Multiples – applying knowledge of multiplication and division to solve factor problems. Square numbers – finding squares and square roots of numbers over 10. Prime numbers - defining, identifying and spotting patterns. $\times \div 10, 100, 1000$	Section 1 of both books - Number and Place Value Factors and Multiples - Section 2 of both books Prime and Square Numbers - Section 2 of both books $\times \div 10, 100, 1000$ - Section 2 of both books
Week 8 27.04.26	Addition, Subtraction, Multiplication and Division – using formal written methods and developing strategies for mental maths. We will also cover the importance of multiplication facts. Multiplying and Dividing Decimals BIDMAS – understanding how the order of operations affects calculations.	Section 2 of both books – Calculations
Week 9 04.05.26	Fractions, decimals and percentages – ordering, converting between and finding percentages/fractions of amounts. Calculating with fractions – adding and subtracting by using a common denominator, multiplying fractions and dividing fractions by a whole number.	Section 3 of both books – Fractions, Decimals and Percentages
Week 10 11.05.26	SATs Week
