

### **Activity for Science w.c. 27<sup>th</sup> April 2020**

On your daily walk, record any vertebrates you have seen. Vertebrates are animals that have a backbone. When you are back at home, make your own classification keys to represent these vertebrates. Look at the PDF documents “Activity Sheet Key Questions” and “Activity Sheet Vertebrates” for examples.

Challenge: Can you make classification keys that compares the vertebrates you have seen on your walk to Vertebrates that live in different habitats? E.g. Arctic / Rainforests.
